

Recording a Session with the iPhone App

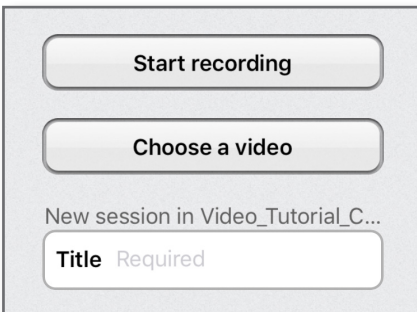

1. After opening the app and logging in successfully, tap the menu button in the upper left to access the menu.

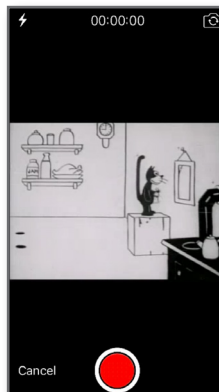

2. Tap "Record & Upload."

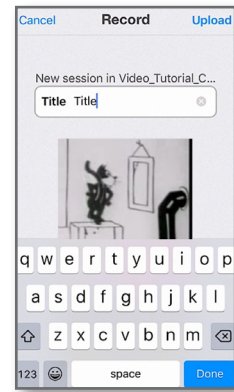

3. Select the course folder you want to record into.

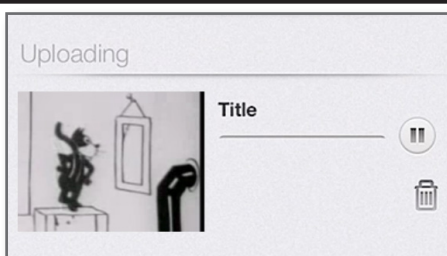

4. Enter a title before or after recording. To initialize iPhone's camera and microphone, click "Start Recording."

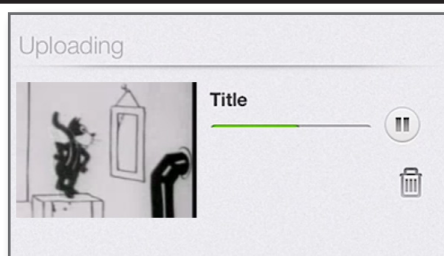

5. Tap the Record button, just as if you were recording regular smartphone video.

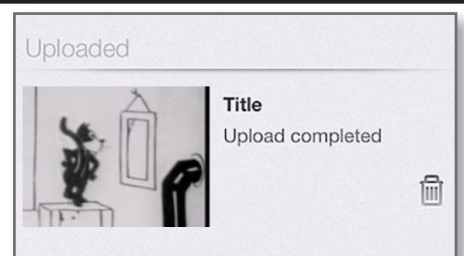

6. Enter a title (if you haven't already) and tap "Done."

7. You can pause or cancel the automatic upload here, via the pause or trash can button.

8. Note the "Uploading" status and advancing green bar.

9. Don't close down the app until you've gotten the "Upload completed" message.
